

Oikivo — 3-Month Feasibility Study (Phase 1)

Property Rental Platform · Egypt · June–August 2026

Scope: Phase 1 only — hosts list properties, guests book them. Web platform only (no mobile app in Phase 1).

Revenue model: 5% service fee charged to guests only. **Exchange rate used throughout:** 1 USD = 50 EGP

1. Business Model Summary

Item	Value
Platform fee	5% of booking total (charged to guest on top of property price)
Host fee	0% — hosts pay nothing (Phase 1 acquisition strategy)
Payment gateway	OPay — 2.25% of transaction + 2 EGP flat fee per booking
Effective net per booking	5% fee – (2.25% + 2 EGP) OPay cost

Example booking:

Property price:	2,000 EGP	(2 nights × 1,000 EGP)
Guest pays:	2,100 EGP	(2,000 + 5% platform fee = 100 EGP platform fee)
OPay deducts:	49.25 EGP	(2.25% × 2,100 + 2 EGP flat)
Platform net:	50.75 EGP	per booking

2. Key Assumptions

Assumption	Value
Average booking value (base case)	2,500 EGP
Average booking value (worst case)	1,500 EGP
Average stay duration	2–3 nights
Platform service fee	5% (guest only)
OPay processing cost	2.25% of gross transaction + 2 EGP flat fee per booking
AWS	FREE — 6-month free tier (EC2 t2.micro, RDS t3.micro, 5 GB S3)
Google Maps API	FREE — 90-day free trial + \$300 new-account credit + 10K free calls/SKU/month (always-on)
Domain	\$11.25/year → paid once in Month 1 ≈ 563 EGP
SSL certificate	FREE (AWS Certificate Manager)
Email (SES)	FREE (62K emails/month free tier)

Push notifications	FREE (Firebase)
WhatsApp sender	T7kom Plus: 100 EGP/month Basic → 200 EGP/month Unlimited
Mobile app	None in Phase 1 — web platform only

3. Revenue Projections — 3 Scenarios

3.1 Realistic / Base Case

OPay cost per booking = (2.25% × guest_pays) + 2 EGP flat. Guest pays = booking value × 1.05.

Month	Properties Listed	Bookings	Avg Booking	Gross GMV	5% Fee (Revenue)	OPay Cost	Net Revenue
Month 1 (Jun)	20	10	2,000 EGP	20,000 EGP	1,000 EGP	493 EGP	507 EGP
Month 2 (Jul)	50	35	2,500 EGP	87,500 EGP	4,375 EGP	2,137 EGP	2,238 EGP
Month 3 (Aug)	90	80	2,500 EGP	200,000 EGP	10,000 EGP	4,885 EGP	5,115 EGP
3-Month Total		125		307,500 EGP	15,375 EGP	7,515 EGP	7,860 EGP

3.2 Best Case

Month	Properties Listed	Bookings	Avg Booking	Gross GMV	5% Fee (Revenue)	OPay Cost	Net Revenue
Month 1 (Jun)	40	25	2,500 EGP	62,500 EGP	3,125 EGP	1,527 EGP	1,598 EGP
Month 2 (Jul)	100	80	3,000 EGP	240,000 EGP	12,000 EGP	5,830 EGP	6,170 EGP
Month 3 (Aug)	200	180	3,000 EGP	540,000 EGP	27,000 EGP	13,118 EGP	13,882 EGP
3-Month Total		285		842,500 EGP	42,125 EGP	20,475 EGP	21,650 EGP

3.3 Worst Case ⚠️

Month	Properties Listed	Bookings	Avg Booking	Gross GMV	5% Fee (Revenue)	OPay Cost	Net Revenue
-------	-------------------	----------	-------------	-----------	------------------	-----------	-------------

Month 1 (Jun)	5	3	1,500 EGP	4,500 EGP	225 EGP	112 EGP	113 EGP
Month 2 (Jul)	12	8	1,500 EGP	12,000 EGP	600 EGP	300 EGP	300 EGP
Month 3 (Aug)	22	15	2,000 EGP	30,000 EGP	1,500 EGP	739 EGP	761 EGP
3- Month Total		26		46,500 EGP	2,325 EGP	1,151 EGP	1,174 EGP

Worst case trigger: slow host adoption, no marketing budget spent, no influencer traction, summer slowdown for domestic travel.

4. Infrastructure Expenses (3 Months)

4.1 Recurring Monthly Infrastructure

Service	Plan	Month 1	Month 2	Month 3	Notes
AWS (EC2 + RDS + S3 + CloudFront)	Free Tier	0 EGP	0 EGP	0 EGP	6-month free tier: t2.micro EC2, t3.micro RDS, 5GB S3, 15GB data out
Google Maps API	90-day free trial + \$300 credit	0 EGP	0 EGP	0 EGP	90-day free trial covers all 3 months; 10K calls/SKU/month free forever + \$300 credit as buffer
WhatsApp (T7kom Plus)	Basic 100 EGP/mo	100 EGP	100 EGP	200 EGP	Upgrade to Unlimited (200 EGP) in Month 3 as messages grow
Email (AWS SES)	Free tier	0 EGP	0 EGP	0 EGP	62K emails/month free
Push Notifications	Firebase Spark	0 EGP	0 EGP	0 EGP	Free for startup volume
SSL Certificate	AWS ACM	0 EGP	0 EGP	0 EGP	Free
Monthly Infrastructure Total		100 EGP	100 EGP	200 EGP	

4.2 One-Time Infrastructure Costs (Paid in Month 1)

Item	Cost (USD)	Cost (EGP)	Notes
Domain (1 year)	\$11.25	563 EGP	Paid once in Month 1
One-Time Total	\$11.25	563 EGP	No mobile app in Phase 1 — no app store fees

4.3 Google Maps — WORST CASE Scenario ⚠️

If user base grows aggressively and Places Autocomplete usage spikes beyond free tiers:

API	Free Tier	Price Beyond Free	Worst Case Overage (Month 3)
Maps JS / Mobile SDK	Unlimited (Essentials)	—	0 EGP
Geocoding API	10K requests/month	\$5 per 1K requests	~250 EGP (50K total requests)
Places Autocomplete	10K requests/month	\$17 per 1K requests	~1,700 EGP (100K total requests)
Directions API	10K requests/month	\$5 per 1K requests	~250 EGP (50K total requests)
Worst case total Maps cost			~2,200 EGP/month

Reality check: Google Maps gives a **90-day free trial** (covers all 3 months of Phase 1) plus a **\$300 new-account credit** (~15,000 EGP worth) that carries over after the trial. At startup traffic (< 200 daily active users), you will almost certainly stay within the always-on free tier for all 3 months. Worst case Maps costs only materialize with 50K+ API calls/month — which means you're already winning.

4.4 AWS After Free Tier (Month 7+, for planning ahead)

Service	Estimated Monthly Cost
EC2 t3.small	~\$15/month = 750 EGP
RDS t3.micro	~\$15/month = 750 EGP
S3 + CloudFront	~\$5–10/month = 250–500 EGP
Total post-free-tier	~1,750–2,000 EGP/month

5. Marketing Expenses (3 Months)

5.1 Monthly Marketing Budget

Content creation (Reels, photos, copy) is done by you — zero cost. **No paid advertising in Phase 1** — 100% organic growth (Facebook Groups, Instagram Reels, WhatsApp, direct host outreach).

| Channel | Month 1 | Month 2 | Month 3 | 3-Month Total | ---|---|---|---| | **Organic only (no paid ads)** | **0 EGP** | **0 EGP** | **0 EGP** | **0 EGP** | | **Monthly Marketing Total** | **0 EGP** | **0 EGP** | **0 EGP** | **0 EGP** |

No marketing costs — content and creatives are self-produced, distribution is fully organic.

6. Total Burn Rate — Month by Month

6.1 Full Cost Summary

Cost Category	Month 1	Month 2	Month 3	3-Month Total
Infrastructure (recurring)	100 EGP	100 EGP	200 EGP	400 EGP
Infrastructure (one-time, Month 1 only)	563 EGP	0 EGP	0 EGP	563 EGP
Marketing (organic — no paid ads)	0 EGP	0 EGP	0 EGP	0 EGP
Total Monthly Burn	663 EGP	100 EGP	200 EGP	963 EGP

6.2 Net P&L — Base Case

	Month 1	Month 2	Month 3	3-Month Total
Net Revenue	507 EGP	2,238 EGP	5,115 EGP	7,860 EGP
Total Expenses	663 EGP	100 EGP	200 EGP	963 EGP
Net P&L	-156 EGP	+2,138 EGP	+4,915 EGP	+6,897 EGP

6.3 Net P&L — Best Case

	Month 1	Month 2	Month 3	3-Month Total
Net Revenue	1,598 EGP	6,170 EGP	13,882 EGP	21,650 EGP
Total Expenses	663 EGP	100 EGP	200 EGP	963 EGP
Net P&L	+935 EGP	+6,070 EGP	+13,682 EGP	+20,687 EGP

6.4 Net P&L — Worst Case ⚠️

	Month 1	Month 2	Month 3	3-Month Total
Net Revenue	113 EGP	300 EGP	761 EGP	1,174 EGP
Total Expenses	663 EGP	100 EGP	200 EGP	963 EGP
Net P&L	-550 EGP	+200 EGP	+561 EGP	+211 EGP

Takeaway: With zero paid ads, the burn rate is ultra-low (663 / 100 / 200 EGP per month). **Every scenario is profitable by Month 2** — even worst case only loses 550 EGP in Month 1 and ends 3 months at +211 EGP. Base case generates +6,897 EGP over 3 months on pure organic. Growth will be slower without paid acquisition, but financial risk is minimal.

7. Break-Even Analysis

Net per booking at 2,500 EGP avg = 5% fee (125 EGP) – OPay (61.06 EGP) = **~63.94 EGP net per booking**

Scenario	Bookings Needed to Break Even
Month 1 (663 EGP — domain + WhatsApp)	11 bookings
Month 2 (100 EGP — WhatsApp Basic)	2 bookings/month

Month 3 (200 EGP — WhatsApp Unlimited)	4 bookings/month
Organic-only mode is near break-even from Day 1	No paid channel dependency

8. Marketing Strategy — Top-of-Mind in 3 Months

Content (Reels, photos, copy, stories) is produced by you — zero cost. Growth is 100% organic — Facebook Groups, Instagram Reels, WhatsApp, and direct host/guest outreach. No paid ads.

Month 1 — "List Your Property, Earn Now" (Host Supply Focus)

Goal: Get 20+ active property listings. No supply = no marketplace.

Action	Budget	Execution
Facebook Groups (organic)	FREE	Post daily in: شاليهات للإيجار, العقارات المصرية, تسهيل العقارات, مجموعات السياحة والسفر
Reels (self-made, 2/week)	FREE	Show a host listing a property in under 5 minutes. Show dashboard earnings counter.
Direct DM outreach	FREE	Find property owners on Instagram, Property Finder, OLX — message them directly with your pitch.
WhatsApp (T7kom Basic)	100 EGP/mo	Host welcome sequence on registration. Booking confirmation & reminder flows.

KPI: Number of active published listings.

Month 2 — "Find Your Perfect Stay" (Guest Demand Focus)

Goal: Drive first bookings, build social proof loop.

Action	Budget	Execution
Instagram & Facebook (organic daily)	FREE	Property showcase posts, stories, Reels — shoot and edit yourself.
Travel Facebook Groups (guest focus)	FREE	Post listings in: شاليهات للإيجار, سياحة مصر, رحلات وسفر, expat groups in Cairo / Alex.
Direct guest outreach	FREE	DM users in travel groups asking about accommodation — reply with direct property links.
WhatsApp (T7kom Basic)	100 EGP/mo	Booking confirmation, reminders, and guest follow-up flows.

KPI: Completed bookings count + first 10 guest reviews.

Month 3 — "Scale What Works" (Double Down on Winners)

Goal: Oikivo = the default answer whenever an Egyptian thinks "vacation rental."

Action	Budget	Execution
Self-made social proof content	FREE	Real guest testimonials (video), before/after host earnings reveals. Arabic-first.
SEO & Google My Business	FREE	Optimize listing pages for Arabic search terms. Update GMB with new photos and reviews.
WhatsApp blast (T7kom Unlimited)	200 EGP/mo	Summer / Eid special offers to past guests. Re-engagement campaigns.

KPI: Week-over-week booking growth rate $\geq 20\%$. First 50 completed bookings total.

Always-On Free Channels (All 3 Months, Zero Cost)

Channel	What to Do
Facebook Groups	Daily posts in: إيجار شقق, شاليهات, travel Egypt, expat groups in Cairo / Alex / Hurghada
Instagram @oikivo	1 property post/day + 2 Reels/week + Stories daily (polls, countdowns, "new listing" stickers)
App Store Optimization (ASO)	Not applicable in Phase 1 (web-only)
Google My Business	Create listing and keep it updated — free local SEO signal
LinkedIn	Target property investors, hospitality entrepreneurs. Post host success stories.
SEO Blog	Articles: "أفضل شاليهات في الساحل 2026", "كيف تأجر شقتك في الزمالك وتكسب أكثر"
WhatsApp Personal	You + team members post property listings on WhatsApp Status daily

9. What to Do in the Worst Case Scenario

If Month 2 ends with fewer than 10 total bookings:

1. **Intensify organic outreach** — post in more Facebook Groups, increase Reels cadence to daily, DM property owners on Instagram / Property Finder / OLX directly
2. **Launch "Founding Host" promo** — 0% commission for any host who lists in the first 60 days, make it loud
3. **Partner directly with 3–5 guesthouses or furnished-apartment owners** — negotiate a listing deal, give them guaranteed first bookings from your own network
4. **Run a referral contest** — "cash يجيب 5 حجوزات يكسب 500 جنيه أول host" —
5. **Manual guest outreach via DM** — find travelers asking for accommodation in Egyptian travel groups and send them listing links
6. **Stay on T7kom Basic (100 EGP/month)** — skip the Unlimited upgrade until booking volume justifies it

10. Cost Reduction Levers (Emergency Mode)

Lever	Monthly Saving	Trade-off
-------	----------------	-----------

Stay on T7kom Basic instead of Unlimited	–100 EGP/month	Cap at 4,500 WhatsApp messages/month
Skip WhatsApp entirely (manual follow-up)	–100 EGP/month	No automated flows
Survival mode (minimum viable burn)	~147 EGP/month	WhatsApp Basic 100 + domain amortized 47

11. Required Capital Summary

Full Budget

Category	Amount
Infrastructure — one-time (domain only)	563 EGP
Infrastructure — 3-month recurring (WhatsApp)	400 EGP
Marketing — organic only (no paid ads)	0 EGP
Total 3-Month Investment	963 EGP (~\$19 USD)

Minimum Budget (Stay on WhatsApp Basic all 3 months)

Category	Amount
Domain	563 EGP
WhatsApp T7kom Basic × 3 months	300 EGP
Total 3-Month Minimum	863 EGP (~\$17 USD)

12. Month-by-Month Timeline

Month 1 – June 2026 [Budget: 663 EGP] — Launch web platform publicly (no mobile app) — Onboard first 20 hosts via personal outreach + Facebook Groups + direct DMs (Instagram, OLX, Property Finder) — Pay domain: \$11.25 one-time (~563 EGP) — T7kom Plus Basic – WhatsApp OTP + booking confirmation flows – 100 EGP — Self-made content daily: Facebook Groups, Instagram Reels, WhatsApp Status — Target: 10 bookings, 20 active listings, first 5 reviews
Month 2 – July 2026 [Budget: 100 EGP] — Scale to 50 active host listings — Organic guest acquisition: Instagram Reels, travel Facebook Groups, WhatsApp Status daily — T7kom Plus Basic – 100 EGP — Self-made Reels and Stories daily — Target: 35 bookings, 50 listings, 20+ reviews
Month 3 – August 2026 [Budget: 200 EGP]

- └ Scale to 90+ listings
- └ Publish social proof content: real guest testimonials (video), host earnings reveals
- └ Upgrade T7kom to Unlimited (200 EGP) for guest re-engagement blasts
- └ SEO: optimize listing pages for Arabic search terms, update Google My Business
- └ Target: 80 bookings, 90 listings, 50+ reviews

13. Risk Register

Risk	Likelihood	Impact	Mitigation
Slow host adoption (supply problem)	Medium	High	Zero-commission promo + personal outreach + direct partnerships
OPay payment failures at checkout	Low–Medium	High	Thorough end-to-end payment testing before launch
Google Maps API overage costs	Low	Medium	Monitor Google Cloud Console weekly; set billing alerts
AWS free tier expiration (Month 7)	Certain	Medium	Budget 1,750–2,000 EGP/month from Month 7 onward
Slow organic growth without paid ads	Medium	Medium	Intensify direct DM outreach; post in more Facebook Groups; increase Reels cadence
Summer hotel price cuts (competition)	Medium	Medium	Differentiate on space, privacy, kitchen — not just price
New platform trust deficit (Month 1)	High	High	Host/guest verification, fast WhatsApp support, visible reviews ASAP
No mobile app limiting reach	Medium	Medium	Ensure web is fully mobile-responsive and fast on 4G

Last updated: May 2026 · Phase 1 Scope — Web Platform, Property Hosting Only
